

ColorEye® XTH

...hand-held color accuracy

The only instrument you'll need for reading
both large and small samples ... as well as all
types of curved surfaces.

Easy choice

intuitive user interface.

Menu-driven operation

significantly reduces

the time required for data collection and analysis. (Data collected by the ColorEye XTH is comparable to that collected by the ColorEye XH and ColorEye XH2.)

Compact, hand-held unit

is about half the size and
weight of competitive units —

making it easy to use in the field.

allowing for easy data collection and

A sophisticated high-speed processor

permits the ColorEye XTH to make
one color measurement per second

— twice as fast as other units —

increasing throughput and

saving time.

Simplified Keypad

with dedicated measurement keys.

We put our 85 years experience in color measurement to work in designing and building a portable spectrophotometer that delivers what our customers asked for.
